## "OCEANS"

THÉO DEDICATES THIS CATALOGUE TO THE OCEANS: OUR COLLECTIVE RESPONSIBILITY IS TO ENSURE THAT WHAT WE CONSUME DOES NOT END UP IN RIVERS, SEAS OR OCEANS!

## THÉO'S ADVANTAGES

Natural and sustainable materials (wood, rattan) \_\_\_\_\_

Evolutive beds \_\_\_\_\_

Soft-closing doors and drawers \_\_\_\_\_

Water-based paints and varnishes without smell or solvents \_\_\_\_\_

Cardboard packaging, no plastic \_\_\_\_\_

Rattan parts are all made by hand \_\_\_\_\_

French and European standards \_\_\_\_\_

NF EN 716 (2018), NF EN 12221+A1 (2013), Cradles: NF EN 1130 (2019)

Long-lasting and high quality furniture \_\_\_\_\_

All hardware in stainless steel \_\_\_\_\_

NEW

3-year guarantee \_\_\_\_\_

French creations \_\_\_\_\_

Furniture and colours presented in this catalogue may slightly vary from commercialised versions.

Technical information of the furniture may evolve and Théo™ reserves the right to modify its products anytime.

Théo™'s furniture is made of natural materials, without any chemical treatment, without any humidity barrier or UV, and the pores of the materials are allowed to breathe. As a consequence, changes of colours or humidity traces can occur, as well as some cracks in the rattan. This has no effect on the strength of our furniture.

POUR LA VIE, NATURALLY

## RATTAN

Since its 2021 collection, Théo has introduced natural rattan: in rattan pole or weaving.

Rattan is a natural plant from South-East Asia, produced by different fast-growing palm species. It can be fine and thornless or thick, long, very thorny with large leaves.

Resistant to shocks, light and flexible, rattan is used for indoor and outdoor furniture, and allows for weaving.

## WHY IS RATTAN SUSTAINABLE?

It grows 7 times faster than a tree, and each liana can measure up to 200 metres. Useful and growing like weeds, rattan is a sustainable fiber and its existence is not threatened.

A beautiful rattan pole needs a longer time to grow: 20 to 30 years to reach maturity.

Rattan cutting is done by hand and the liana base is replanted, in order to grow again. Once cut, the liana is divided in several parts: the stem is sorted by thickness and the skin is reserved for weaving.

Rattan enables local populations to inhabit tropical forests where it grows, hereby encouraging the preservation of the ecosystem; it is an alternative to the intensive exploitation of these forests.

# NÉMO

NEW

ENTIRELY MADE OF RATTAN, THIS LOVELY NÉMO BED USES THE 'FRENCH RATTAN WEAVING' TECHNIQUES, IS VERY LIGHT AND EASY TO MOVE AROUND THE ROOM.

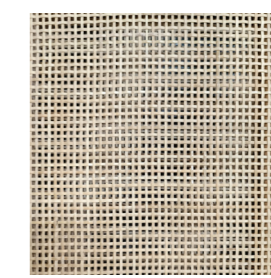

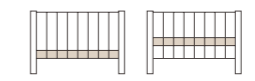

## NÉMO

### BED

**60 x 120 cm**

# THÉO'S COMMITMENTS

SINCE 1<sup>ST</sup> JANUARY 2020, ALL PRODUCTS LEAVING OUR WORKSHOP ARE 100% BIODEGRADABLE

## WOOD

Théo uses wood from sustainably managed forests. White Australian Cedar (*melia azedarach*, margousier) is as strong as oak, resistant to insects and fungus, has a fast growing rate, and its leaves have medicinal properties that are beneficial to health.

## MDF

MDF used by Théo is made of sustainably-grown rubber tree. Théo has chosen to use carb-P2 with American standards because it contains a very low level of formaldehyde: 4,1mg/100g (tested by an independant laboratory), which is much lower than European E1 standards (maximum 8mg/100g).

## WATER-BASED FINISHINGS

Théo uses a water-based paint, without solvent or smell, non toxic. Baby is protected, as well as his family and Earth. Thanks to the quality of its materials, Théo has obtained the LABEL A of air quality (ISO 16000 used in French housing, tests done by an independant laboratory).

## RATTAN

Useful and prolific, rattan is a sustainable fiber which existence is not threatened. Rattan enables local populations to inhabit rainforests where it grows, keeping the ecosystem alive and providing an alternative to high-level exploitation of these forests.

## ÉCO-FURNITURE

**Écomobilier** For each piece of furniture sold in France, Théo contributes towards Eco-Mobilier, to recycle end-of-life furniture. [www.eco-mobilier.fr](http://www.eco-mobilier.fr)  
Member reference: FR 027060

## TRIMAN

Théo's furniture (as well as the packaging the furniture is delivered in) is recyclable and subject to recycling instructions.

## FRENCH CREATIONS

Théo is a French brand distributed in Europe and Asia, which greatly contributes to spreading French culture and style, along with the aim of quality and sustainability.

## SAFETY

Our beds, chests of drawers, changing boxes and co-sleeping cradles are tested by an independant French laboratory (Laboratoires Pourquery), in order to ensure they comply with French and European standards on children's safety: Beds NF EN 716 (2018), Changing Box (with chest of drawers and bed) NF EN 12221+A1 (2013).

POUR LA VIE, NATURALLY

# THÉO'S TEAM

Théo is the story of 3 French entrepreneurs who settled in Asia between the 80's and 2000s.

After several decades of pursuing individual business ventures in commerce, wood and furniture, they met and created the Théo Bébé brand in 2014 (which used to exist in a different form in France since 1999).

In order to preserve the original spirit of Théo, the managing team is French, based in France, Europe and Asia.

# THE WORKSHOP

Opened in 2008 and owned since 2014 by Théo's partners, our workshop is specialised in baby products; quality and safety are our priority.

We based our workshop in Indonesia to be close to the source of rattan, and where people have perfected the best skill to weave rattan for generations.

Our workshop follows all labour and safety regulations and best social practices. The workshop is regularly audited by Bureau Véritas to ICS (Initiative for Compliance and Sustainability) standards for ethical management.
